PROFESSIONAL SUMMARY

Mechanical Engineer with 3+ years' experience in manufacturing, quality control, design, and client operations. Skilled in interpreting drawings, material ID, supplier coordination, and SOP compliance. Proven record of accomplishment in meeting quality metrics and collaborating across teams. Well-aligned for Feedback Engineer / Analyst roles in manufacturing-driven environments

CORE HIGHLIGHTS

- Manufacturing Knowledge: Mechanical assemblies, pressure vessels, machinery components, material identification
- Engineering Documentation & Process: Engineering drawings interpretation, P&ID analysis, procurement documentation, quality control, SOP adherence, production coordination
- Feedback & Stakeholder Management: Issue analysis, feedback handling, supplier and vendor coordination, cross-functional communication, follow-up and escalation
- Tools & Applications: MS Office (Excel, Word, PowerPoint), Mechanical Design (ProE, AutoCAD, Tribon M3, Ansys), Software & Web Development (Android Studio, VS Code, Flutter/Dart, Python, C++, HTML/CSS/JS, React, Django).

PROFESSIONAL EXPERIENCE

Other Relevant Experience | Jan 2023 – Present

Freelance Web & Software Developer

- Designed websites and software applications for local businesses, improving client reach and workflow efficiency.
- Supported workflow efficiency through basic systems analysis, documentation, and issue resolution.

Business Administrator, Family Business – Logistic, Export and Wholesale vegetable market

- Managed daily operations, inventory, vendor coordination, and customer handling.
- Handled customer feedback, order tracking, and vendor coordination to ensure timely delivery.
- Implemented digital record keeping, reducing inventory errors by 20%.

Design Engineer Trainee (MOD Dept.) – Cochin Shipyard Limited, Kerala | May 2022 – Dec 2022

- Prepared procurement documentation for Fuel Cell Catamaran Ferry Project.
- Assisted in drafting technical specifications for NDS 137m Sea Shuttle/Samskip vessel.
- Developed 2D/3D piping drawings and fittings for passenger vessels (500 capacity), improving design accuracy.
- Coordinated with engineering, planning, and production teams to resolve design-related feedback.

Graduate Apprentice Engineer Trainee (MOD Dept.) – Cochin Shipyard Limited, Kerala | Mar 2021 – May 2022

- Designed and analyzed marine piping systems for cargo and passenger vessels (500 & 1200 capacity).
- Developed skeleton diagrams and pipe length estimations, improving planning accuracy by 15%.
- Coordinated with QC and Production Planning teams for drawing resolution.
- Trained junior trainees in engineering drawing practices.

Quality Control Engineer Trainee – Mitsuba India Pvt. Ltd, Tamil Nadu | Sep 2020 – Mar 2021

- Conducted quality inspections of stator motors and fuel injector assemblies.
- Ensured compliance with engineering blueprints and specifications, enabling on-time shipments.
- Identified and documented defects and nonconformities, collaborating with production teams.

Mechanical Supervisor – Horizon Engineers & Contractors, Gujarat | Jun 2019 – Aug 2020

- Supervised boilers, pressure vessels, and pipeline construction under high-pressure conditions.
- Coordinated with suppliers and technicians for material availability and execution timelines.
- Ensured work followed approved drawings, safety guidelines, and standard procedures.
- Managed work force and resources to meet delivery and performance targets.

EDUCATION

Bachelor of Engineering (Mechanical Engineering) | 2019

Christian College of Engineering & Technology, Oddanchathram, TN | Anna University | Graduated with 83.5%
